

COMPOSITIONS AND METHODS FOR REGULATING PHAGOCYTOSIS AND
ICAM-1 EXPRESSION

5 Abstract of the Disclosure

This invention provides compositions of matter for treating and preventing certain mammalian disorders ameliorated by either an increase or decrease in
10 phagocytosis or ICAM-1 expression in appropriate cells. This invention also provides methods of altering the phagocytosis or ICAM-1 expression level in a cell. This invention further provides methods of treating and preventing mammalian disorders affected by the
15 alteration of phagocytosis or ICAM-1 expression. The instant methods and composition of matter all relate to the use of agents that specifically increase or decrease phagocytosis or ICAM-1 expression. Finally,
20 manufacture.
